[DIAGREEN ALGAE – QC CHECK]

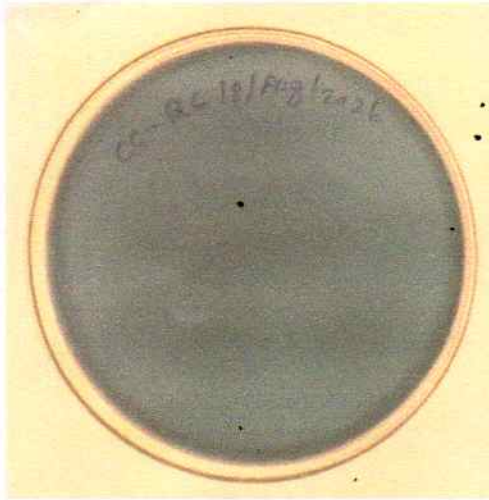

Strains tested: *Thalassiosira weissflogii*, *T. pseudonana*, *Chaetoceros gracilis* and *Vibrio* sp. (VibQuench probiotic) culture sample as positive control.

Source of sample: Algae - Photobioreactor; *Vibrio* culture - glycerol stock from -80 deep freezer.

18 AUG , 2026

[DIAGREEN ALGAE – QC CHECK]

Result:

- * No culture growth observed in Algae sample, indicating that the algae sample tested is Vibrio Free.
- * Growth of yellow colony forming bacteria observed in positive control, indicative of a proper TCBS culture plate.
